**INQUIRY INTO HEALTH AND WELLBEING OF
KANGAROOS AND OTHER MACROPODS IN NEW SOUTH
WALES**

Name: Mrs Simone Lea Home

Date Received: 20 April 2021

Kangaroos are our wildlife. It's their land. Stop killing them. They are not over populated. To the contrary they are being made extinct. Your numbers are biased towards the govt and anyone invested in their flesh or skin. Leave kangaroos alone. Cattle should not be on Australian soil in their numbers. Again an industry based around money. When we can all live happy and healthy lives without harm or killing animals why wouldn't we?
