

**INQUIRY INTO IMPACT OF THE REGULATORY
FRAMEWORK FOR CANNABIS IN NEW SOUTH WALES**

Name: Mrs Michelle Hugginson

Date Received: 10 May 2024

I have suffered from migraines since I was a child. I've had all the tests and no causes have been found. I am allergic to codeine, and morphine does not work. so my pain relief is very limited. As an adult I have found that marijuana works well for me.

I really hate the fact that my 'medicine' makes me a criminal. Plus if I have a road side drug test I could lose my license. I may get a migraine once a month or once a week, or not for a few months. So a test done could show that I have the substance in my system, but if taken days or weeks after using I would no longer be affected.

I am a law abiding citizen in all ways except this. And I would dearly love to be able to buy it legally for medical purposes or just for leisure.
